Email: saurabhsjingade@gmail.com

Mob: +91-6361795618

[LinkedIn](#) | [Medium](#) | [TryHackMe](#)

Address: Bengaluru, India

TECHNICAL SKILLS

Networking & Systems: TCP/IP, L2/L3, BGP, OSPF, Linux, UNIX, Windows | Hypervisors: KVM, VMware/ESXi | Vendors: Fortinet, Cisco, Juniper | Testing & Automation: Python, PyTest, Network Automation | Performance & Validation: RDMA, DPDK, NFSoRDMA | Tools: Spirent Avalanche, CyberFlood | QA: SDLC, DevOps

PROFESSIONAL CONTRIBUTION

Isha Institute of Inner-Science (McMinnville, USA | Vancouver, Canada)

Sept 2023 – Oct 2024

- Setup, configured and managed Cisco Firepower 1010 using Firepower Device Manager (FDM)
- Implemented security policies, NAT rules, access control policies, geolocation restrictions and Snort-based IDS enhancing the overall network security posture of the organization with more than 95% uptime

PROFESSIONAL EXPERIENCE

Catalina Systems (Pvt) Ltd.

Feb 2026 – Present

Senior Software Engineer

- SmartNIC system validation and automation for high-performance networking and storage across Linux and KVM environments
- RDMA and data-path testing, including NFSoRDMA validation, RDMA micro-benchmarks (RPING, PINGPONG), and performance analysis across kernel, DPDK, and SoftRoCE paths
- Python + PyTest automation and low-level debugging across Linux, RDMA, and storage stacks (NFS, iSCSI, NVMe), covering latency, throughput, PPS, and CPU metrics.

ACL Digital | Motorola Solutions

Senior Virtualization Engineer

Feb 2025 – Dec 2025

- Migrated the WAVE Tactical Product from VMware to RHEL KVM, including virtualization setup, deployment testing on Dell and HP servers, and debugging issues based on FRD and SDD
- Authored test plans, test cases, and reviewed customer-facing documents (FRD and SDD) while participating in peer reviews to ensure quality and alignment with product requirements

Fortinet (Burnaby, Canada)

Software Release QA Specialist – Benchmark Team (R&D)

May 2022 – Aug 2023

- Built a testing environment from scratch in Fortinet's data center by assembling Dell EMC Servers, FortiGate (FGT), Fortinet Access Points, L1 Switch, and Spirent's Avalanche for benchmark testing
- Performed benchmark regression testing on Forti-OS (FOS) across hypervisors, including VMware ESXi and KVM, covering a range of CPU cores and NICs such as Intel, NVIDIA Mellanox (MLX) and Broadcom for 10G and 100G network loads using a combination of manual and automated testing techniques
- Wrote and maintained auto scripts, troubleshooting issues related to FGT configuration and deployment across hypervisors
- Optimized FOS performance by tuning CPU affinity settings for better resource utilization and load balancing
- Created test scenarios for FOS features, including Throughput, Concurrency, CPS, Log, Proxy AV, DLP, Flow AV, SR-IOV, IPv6, and DPDK, Non SR-IOV, IPsec, SSL-VPN test cases

Tata Consultancy Services (Bengaluru, India)

System Engineer – Sr. Network Engineer

May 2021 – April 2022

- Configured and maintained Cisco routers/switches across 15+ sites using L2/L3 protocols; automated tests using Python
- Implemented BGP/OSPF routing with network automation; improved performance and cut latency by 20% via QA validation

System Engineer – Jr. Network Engineer

Jan 2018 – Aug 2019

- Managed client's Juniper SRX series firewalls, enforcing security policies and mitigating cyber threats by 30%
- Administered Zscaler VPN solutions, ensuring secure vendor access for 500+ users across multiple geographies

Assistant System Engineer – Network Administrator

Mar 2017 – Dec 2017

- Assisted in implementing and configuring Cisco devices, tuning them for optimal security and performance

System Engineer Trainee – Network Security

Dec 2016 – Feb 2017

- Supervised a team of 6 to build and diagnose issues in small/medium-sized networks
- Completed Initial learning Program (ILP), undergoing 12 weeks of training in configuring Standard Network Protocols on Vendor Machines like Cisco and Juniper

VOLUNTEERING

Isha Foundation (Vancouver, Canada)

Aug 2023 – Oct 2024

- *Yoga Teacher* - conducted Upa-yoga and Isha Kriya sessions for over 150 participants
- *City Promotions Coordinator* - engaged more than 10,000 participants through promotional activities
- *Program Coordinator* - coordinated Inner Engineering Total program for 57 participants

EDUCATION

University of Alberta, Edmonton - Canada – MS, Internetworking (Cybersecurity)

GPA: 3.9/4

Sep 2019 – Apr 2021

Visvesvaraya Technological University, Bengaluru - India – BE, Telecommunications

GPA: 3.3/4

Sep 2012 – Jun 2016

PROJECTS

Implementing SOC and Honeypot in Azure Sentinel

Feb 2024

- Created a honeypot to trace the attacker's geolocation using Microsoft Sentinel (Cloud SIEM)

Research analysis and implementation of security attacks in 5G and IoT

Sep 2020 – Mar 2021

- Researched the 5G network, its evolution, and architectures
- Simulated network attacks like DoS, Sinkhole, and IMSI catchers and provided mitigation strategies on 5G network using NetSIM

Advanced Routing & Network Management

Jan 2021 – Feb 2021

- Simulated and deployed both interior (OSPF) & exterior (BGP) routing protocols in the current large-scale network using CML

CERTIFICATIONS

- **Python Network Programming** for Network Engineers (Python 3)
- Fortinet Network Security Expert Level 2: Certified Associate
- **OSINT | TCM Security**
- **Jr. Penetration Tester**

July 2025

Mar 2023

Feb 2022

Nov 2021
